

Beneficial Ownership Guide

The Beneficial Ownership Guide provides information about the disclosure regimes of 35 countries. Updated annually, this information is necessary for holders of securities of public companies, and includes rules on disclosing positions to issuers, the market and regulators, as well as procedures and timelines for doing so.

Provided as a subscription service to clients of Schulte, the guide delivers information to private equity firms, hedge funds, and institutional and sophisticated individual investors. It is a companion to the World Sky Service, which summarizes private placement laws around the world for private equity and hedge funds. Subscribers to the Beneficial Ownership Guide can access the service by [clicking here](#).

If you are a client of the firm and would like to learn more about this service, please contact us at SRZConnectHelp@srz.com.
